The first of these is the fact that the
 number of people who are employed in the
 service of the government is increasing
 rapidly. This is due to the fact that
 the government is expanding its activities
 in many fields, and is therefore
 requiring more personnel to carry out
 its functions. This is particularly true
 in the case of the armed forces, where
 the number of troops is being increased
 to meet the demands of the situation.
 Another factor is the fact that the
 government is becoming more and more
 centralized, and is therefore requiring
 more personnel to carry out its functions.
 This is particularly true in the case of
 the executive branch, where the number
 of officials is being increased to meet
 the demands of the situation.

The second of these factors is the fact
 that the number of people who are
 employed in the service of the private
 sector is also increasing. This is due
 to the fact that the private sector is
 expanding its activities in many fields,
 and is therefore requiring more personnel
 to carry out its functions. This is
 particularly true in the case of the
 manufacturing industry, where the number
 of workers is being increased to meet
 the demands of the situation. Another
 factor is the fact that the private sector
 is becoming more and more centralized,
 and is therefore requiring more personnel
 to carry out its functions. This is
 particularly true in the case of the
 financial industry, where the number of
 officials is being increased to meet the
 demands of the situation.
